

Keyboard Shortcuts Cheat Sheet Hub

- **Description:** A handy reference website designed to help computer users, students, and professionals quickly find and master essential keyboard shortcuts for popular operating systems and software. The platform aggregates time-saving key combinations for tools like Windows, macOS, VS Code, and browser navigation into an organized, searchable layout. Users can easily look up shortcuts by category or application without having to dig through dense official documentation pages. Through a clean, minimalist design and responsive layout, it serves as an efficient everyday utility for anyone looking to boost their computer productivity.
- **5 Unique Pages:**
 1. **Home / Welcome Page:** Overview of the site, featured application shortcuts, and quick navigation cards.
 2. **Operating Systems Catalog:** Shortcuts for Windows and macOS navigation and file management.
 3. **Development Tools Page:** Keyboard shortcuts for text editors and developer environments like VS Code or terminal apps.
 4. **Browser & Productivity Page:** Shortcuts for web browsers, spreadsheet software, and common office apps.
 5. **About & Feedback Page:** Information about the site's purpose, tips on learning shortcuts, and a contact form.
- **Easy JavaScript Feature:** A live search bar or category filter that lets users instantly type and filter shortcuts on the page.
